PROJECTS

Banking Management System

Jan 2024 – Mar 2024

Tech stack: Python, Django, MySQL, Bootstrap

- Designed and built a full-stack banking application supporting account creation, fund transfers, and transaction history, with separate customer and admin access levels.
- Implemented secure login and session handling, and used Django ORM with MySQL to keep transaction records consistent under concurrent updates.
- Built an admin dashboard for account oversight and transaction auditing, cutting manual reconciliation work for test scenarios.

College Administration Portal

Aug 2022 – Dec 2022

Tech stack: Python, Django, SQLite, Bootstrap

- Built a portal to manage student records, fee tracking, and document storage for a full academic department.
- Designed an admin dashboard with automated installment reminders, reducing manual fee follow-ups.

Student ERP Portal

Mar 2022 – Jul 2022

Tech stack: Python, Django, SQLite, Bootstrap

- Developed a secure, role-based authentication system covering both student and admin access.
- Built student record management with admin-level controls for creating, updating, and archiving data.

EXPERIENCE

Full Stack Development Intern | ICT Academy

Aug 2023 – Sep 2023

Tech stack: Django, Bootstrap, Python, SQLite

- Built full-stack web applications end-to-end using Django and Bootstrap for internal academy use cases.
- Developed a Hospital Management Portal with CRUD operations and user authentication, streamlining patient-record handling for staff.

Web Developer Intern | Sonytech Agra

Sep 2023 – Dec 2023

Tech stack: HTML, CSS, JavaScript, Bootstrap

- Rebuilt key sections of the company website's UI, improving responsiveness and lifting user interaction by 40%.
- Profiled and fixed front-end performance bottlenecks, cutting page response time by 25%.
